

Stake A Claim Animal Cards

Red-Backed Vole

- nests built beneath vegetation, rocks, and roots in underground burrows
- eat berries, leaves, twigs, buds, and mosses

Boreal Chickadee

- nest in a hole in a tree, digging it out or using a natural cavity or abandoned woodpecker nest
- eat seeds and insects off of evergreen branches and bark

Wood Frog

- hibernate under soil and leaf litter in dryer upland habitats
- take summer shelter in moist forests and bogs
- eat beetles, flies, caterpillars, spiders, slugs, and snails

American Red Squirrel

- create grass and twig nests in tree branches
- eat mostly spruce cones, which they store in large underground caches
